A Critical Reflection on the Design of the Web Witchcraft and Wizardry Project

Edmund Mulligan

April 4, 2026

Abstract

Abstract goes here.

1 Introduction

2 Submission Deliverables

High fidelity user interface designs of the following pages:

- Home page
- Student Dashboard
- Sample Lesson

Additional deliverables:

- Colour palette and typography specifications for the above pages
- Animated GIFs demonstrating the animated elements Home page
- (For reference) The six digital images submitted in the last assignment

These can all be viewed in the Design System section of
`https://web.witchcraft-and-wizardry.school/diagnostics`.

A prototype of the website can be accessed at `https://web.witchcraft-and-wizardry.school`, although this is still under construction and may be subject to change while this assignment is being assessed.

3 Overarching Concept

3.1 History and Inspiration

The Web Witchcraft and Wizardry project, originally used by Kingston University Code Dojo, was a pdf file with a single html file and some inline CSS and JavaScript to get students started. This was then developed into a web site in github with eight lessons (Mulligan, 2024), although no consideration was given to aesthetics or usability. The current project aims to redesign the website with a focus on accessibility and visual design, while maintaining the original Code Dojo concept of teaching kids to code by coding (CoderDojo Foundation, 2026).

Inspiration for the colours of the new website were taken from the Embodied Mind logo, see figure 1. The vibrant style was drawn from 1960's art such as the work of Roy Lichtenstein (e.g. Lichtenstein (1963)) and the television series Batman (Warner Bros. Television, 1966–1968). See figures 2 and 3 for examples of this style using bold colours and dramatic contrasts. The subdued style, for users who do not want the strident colours of the other two styles, uses a

desaturated theme, arguably evoking a pre-colour black and white television look, although this is admittedly a tenuous link.

Figure 1: The Embodied Mind logo

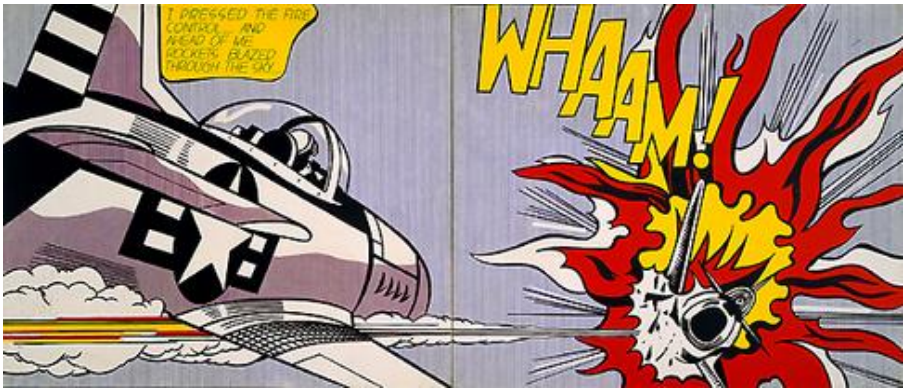

Figure 2: Roy Lichtenstein's Whaam! (Lichtenstein, 1963)

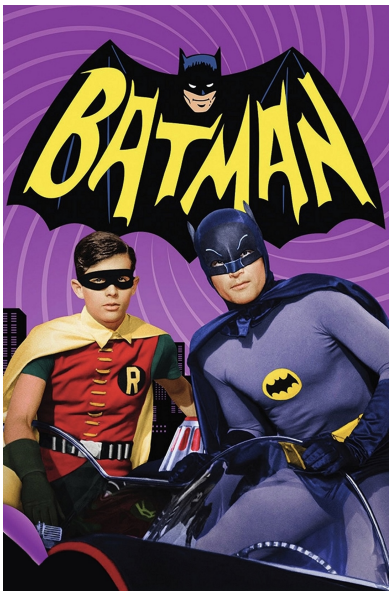

Figure 3: Adam West as Batman (Warner Bros. Television, 1966–1968)

3.2 Design Process

4 Digital Images

5 User Interface Designs

5.1 Colour

5.2 Typography

5.3 Layout

5.4 Animation

5.5 Accessibility

6 Conclusion

Word count

Word count: 264 words (excluding references)
